

YJ4600 | Area Imaging Scanner

The YJ4600 is a general purpose area imaging scanner targeting middle to low segments of the 2D bar code scanning market. With competitive pricing, outstanding performance, ergonomic design and optimum functionality, YJ4600 meets the demands of a wide variety of applications. If you are looking for a cost effective but high performance area imaging scanner, the YJ4600 will be your ideal choice.

Nowdays 2D barcodes are used in many industrial applications and are becoming increasingly popular. From patient wrist band to manufacturing assembly line, from mobile coupons to airline boarding pass, 2D bar codes can be found in almost every facet of our lives. To read these 2D bar codes, an area-imaging scanner is needed.

Although many enterprises have realized the importance of imaging technology, the cost of most 2D scanners remain high. Many users find themselves caught between limited budgets and a need of upgrading their scanner technology to a 2D platform in the near future. Additionally, savvy purchasers are looking for a cost-effective scanning solution that can read 2D bar codes both on traditional paper and on new electronic media, such as mobile screen.

The YJ4600 2D imaging scanner provides an affordable solution for enterprises who wish to upgrade their equipment. Not only does it accurately and quickly read both 1D and 2D barcodes, it also seamlessly captures barcodes on electronic screens (such as mobile phone) and provides an effective data acquisition tool for e-coupons and e-tickets. With advanced imaging and decode technology, the YJ4600 has a superior first-pass read rate on poorly printed and low quality codes. The product is an ideal choice for a wide variety of applications, including airline transportation, banking and securities, e-tickets, and many more.
